World School

*Sirens help  
in emergencies,  
what else do  
ambulances do?*

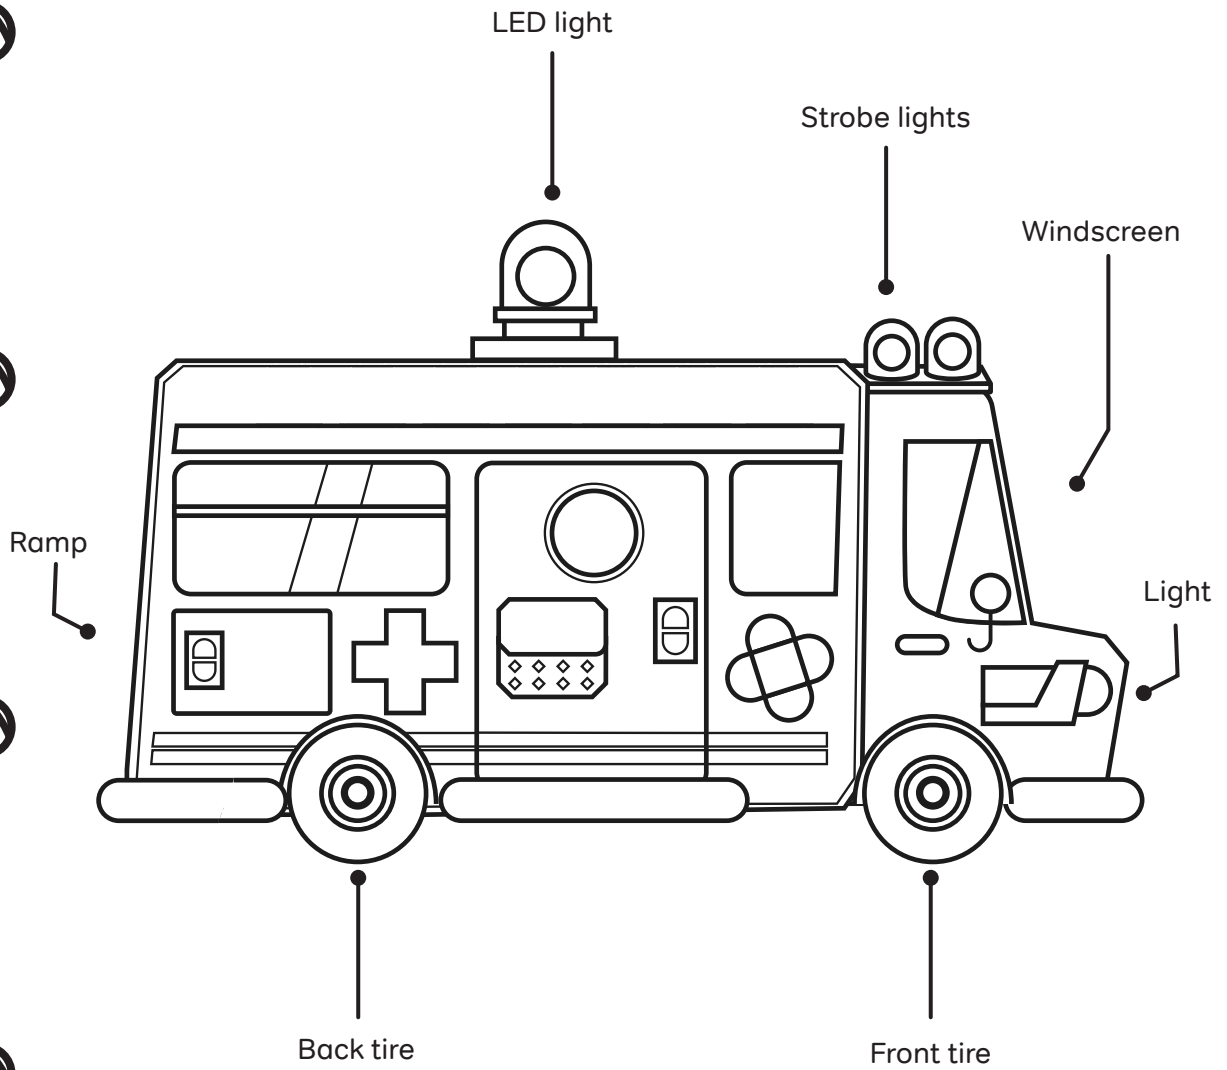

# Ambulance

## Owner's Workshop Manual

- An EMT rides in an ambulance and helps people who are hurt or sick.
- The gurney is a wheeled stretcher that transports people to the ambulance.
- Oxygen can be given to help people breathe.
- An ambulance also has an IV if a person needs fluids.

# Ambulance Information

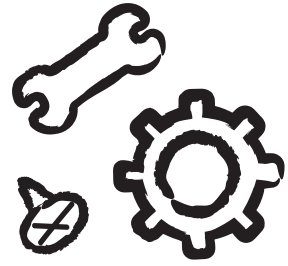

---

Use your favorite colors to decorate the ambulance!

# Ambulance Design Challenge

---

**An ambulance is an emergency medical vehicle.**

**What you need to do...**

Create a first aid kit for your family. Collect items that would be helpful if someone is hurt, and organize them in a bag or box.

You can also use the next page to draw items for your own special first aid kit!

**Things to think about:**

What type of medical equipment would you need for a cut or scrape?

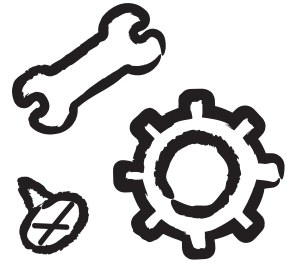

What would you need for a bruise?

Where will you store your first aid kit so family members can easily access it?

# Ambulance Design Challenge
