Tractors are
farmers' helpers!

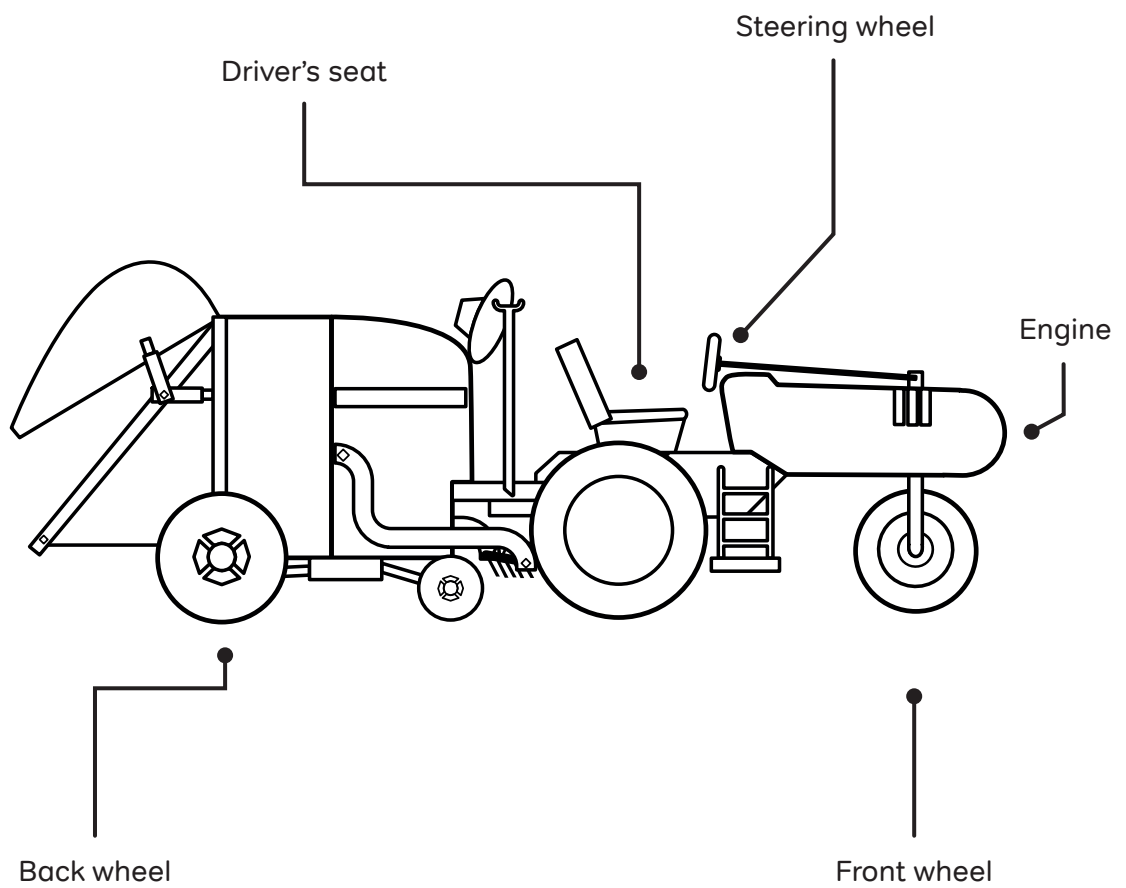

Tractor

Owner's Workshop Manual

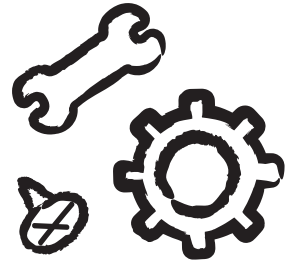

- Tractors usually have very large wheels
- Strong work vehicles that are used for farming
- They were invented over 150 years ago to help farmers
- They have large and powerful engines
- Usually, tractors have only one seat

Tractor Information

Use your favorite colors to decorate the tractor!

Tractor Design Challenge

Tractors have large wheels and help workers get big outside jobs done.

What you need to do...

Tractor wheels have grooves to help the tractor grip unstable or wet ground.

Grab some playdough and some of your toy vehicles... it's time to examine our tires!

Roll out the playdough and let's make some tracks. Compare the tracks made by your different toys. Draw the different patterns on the next page!

Things to think about:

Do bigger wheels make bigger tracks?

Which of your toy vehicles have the deepest wheel grooves?
